1. Claims 1-34 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-108 of U.S. Patent No. 6,745,079 in view of Hassett (2001/0005783). See previous office action.

2. Claims 1-19,21-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bush et al (5,282,845) in view of Hassett (2001/0005783).

See previous office action.

The remarks made by applicant have been considered, however the above rejections are still deemed to be proper. The term 'tightly' added to the independent claims is a relative term. The electrodes of Bush could be considered to be tightly curled. Further, it is considered to be common sensical that if a more tightly wound electrode is needed to fit a certain location inside the patient, the electrode could be adapted to be tightly wound to any degree necessary.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action.
